

MADHAV PAL

Backend Developer | Node.js | REST APIs | MongoDB | Blockchain

mdpal630@gmail.com | +916307905714 | linkedin.com/in/madhav-pal-a3610b27b | github.com/madhavpal | Gurugram, India

PROFESSIONAL SUMMARY

Backend Developer with 1.5+ years of experience in designing and developing scalable server-side applications using Node.js and Express.js. Skilled in building secure RESTful APIs, optimizing MongoDB databases, integrating payment gateways, and implementing blockchain-based solutions. Strong focus on performance, data consistency, and clean architecture.

PROFESSIONAL EXPERIENCE (Aug 2024 - Present)

Mad Over Music(MOM) : Developed backend system enabling royalty ownership, resale, and secure transaction tracking with blockchain and payment integration.

- Designed and developed complete backend architecture for a music royalty investment platform
- Built scalable RESTful APIs for authentication, song management, royalty purchase, resale workflows, and transactions
- Optimized MongoDB schemas and queries for high performance
- Integrated Polygon blockchain for secure ownership tracking
- Implemented Razorpay payment gateway for transactions
- Developed CRUD operations for users, songs, and royalties
- Ensured data consistency between blockchain and database
- Implemented error handling and validation

UrjaMitra

- Designed and implemented hierarchical role management system (Project Manager → Sr. Sales Manager → Sales Manager → Urja Mitra), enabling admin to visualize and manage complete reporting structure
- Resolved critical issue where admin was unable to view multi-level user hierarchy, improving dashboard usability and data visibility
- Developed RESTful APIs to allow admin to assign and manage targets for Sales Managers and Urja Mitra users
- Built dynamic target allocation logic ensuring:
 - Existing onboarded users retain previous targets
 - Newly onboarded users receive updated targets
- Implemented bulk target assignment API enabling admin to apply uniform targets across all users with a single action
- Ensured scalable backend logic for handling user onboarding and target distribution workflows
- Improved system efficiency by reducing manual intervention in target management and hierarchy mapping

Web Development Intern – Unusual Digital | Sep 2023 – Dec 2023

- Developed responsive WordPress websites using Elementor
- Built user interaction forms and handled spam tools
- Optimized for mobile responsiveness and cross-browser compatibility

TECHNICAL SKILLS

Node.js, Express.js, MongoDB, MySQL, Polygon, Razorpay, JavaScript, GitHub, VS Code, Excel, PowerPoint

EDUCATION

MCA – Galgotias University (2022–2024) | 74%

BCA – Babu Banarasi Das University (2019–2022) | 77.67%

Intermediate & High School – Modern Public School (2016–2019)

CERTIFICATIONS

Web Development – Unusual Digital | HTML & CSS – Great Learning

SOFT SKILLS

Communication, Problem-solving, Quick learner
